Budgeting and balancing life and college	Setting a New Year's resolution—or simply a goal—is a great way to make a positive change in your life. Having goals give us a sense of meaning and purpose because usually they are tied to self-improvement such as losing weight, saving money, or running a marathon. However, goal setting is only part of the equation—accomplishing the goal is the other. Busy lives, lack of motivation, and lost interest are some of the top reasons why people don't stick with their goals. Whether you've had success with goal setting or not, this webinar can help you to make a fresh start and figure out ways to finish what you've started. We will discuss how to establish meaningful goals, ways to better utilize willpower, and strategies for winning the race.
